Art Unit: 1764

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 17, 2005 has been entered.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 40-58 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

There is no support in the specification as originally filed for at least the following newly claimed limitations:

- 1) "agglomerating" the coal powder with fresh hydrated lime. The specification, as filed, teaches blending the coal powder with fresh hydrated lime. The blend is then agglomerated with water.
- 2) the specification does not teach the use of an enclosed vessel.
- 3) the specification does not teach "immediately injecting the dried agglomeration into a combustion chamber."

Art Unit: 1764

4) "without binders added thereto" or "being free of binders of materials other than the fresh hydrated lime".

It is noted that applicants have not pointed to where the specification provides support for the newly claimed limitations.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 56 and 57 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 56 and 57 lack antecedent basis for "passing the agglomeration to an externally heated oven", i.e., claim 53, from which claims 56 and 57 depend, the agglomeration is heated "in said enclosed container". "said enclosed container" refers to the enclosed chamber wherein water is added to the coal powder and fresh hydrated lime.

Applicant's arguments with respect to claims 40-58 have been considered but are moot in view of the new ground(s) of rejection.
